

REMARKS

The Applicants hereby submit this Amendment and Request For Reconsideration in response to the Office Action mailed on 30 March 2010 for the above-identified patent application.

In the present Amendment, the Applicants amend claims 26-33; no claims have been added or canceled. No new matter has been entered by this paper; the claim amendments are fully supported by the application as originally filed. The Applicants respectfully request entry of the amendment and reconsideration of the claims as revised.

In the Office Action of 30 March 2010, the Examiner indicated that claims 1-25 of the present application were allowed. In response, the Applicants respectfully acknowledge the Examiner's indication of allowability of these claims.

In the same Office Action of 30 March 2010, the Examiner rejected claims 26-33 of the present application under 35 U.S.C. § 101 as being directed to non-statutory subject matter. In response, the Applicants amend claims 26-33 to change the previously-recited "computer program product" to a "non-transitory computer program product," and the previously-recited "computer storage medium" to a "non-transitory computer storage medium," as suggested by the Examiner for allowability.

Therefore, the Examiner's 35 U.S.C. § 101 concerns with respect to claims 26-33 are now overcome. In addition, amended claims 26-33 are allowable over the prior art of record for the same or similar reasons as provided earlier with respect to 1-25.

Thus, the Applicants submit that all pending claims 1-33 of the present application are allowable over the prior art of record, and otherwise meet all statutory requirements for patentability. The application is now in a condition suitable for allowance.

Thank you. Please feel free to contact the undersigned if it would expedite prosecution of the application.

Respectfully Submitted,
/John J. Oskorep/
